

Leveling Devices

Original Series Socket Style with Delrin® Base Stainless Steel

These original series socket style leveling devices in stainless steel feature a Delrin[®] base that protects floors and surface finishes, and provides superior resistance to repeated impacts, solvents, moisture and temperatures up to 190°F. The stainless steel design offers further protection from rust and corrosion.

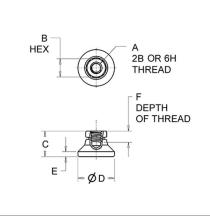

Typical Uses

- Data storage equipment
- Large medical equipment
- Material handling equipment
- Industrial workstations
- Industrial machines

Special Features

- Hardened ball
- Integrally machined hex
- Protects floor/surface finish
- Large diameter base support
- 15° swivel off centerline
- Stainless steel resists rust and corrosion
